

Take Advantage of This Opportunity and Join Our Team as

Electrical Engineer for Renewables (m/f)

Interenergo is an international energy company headquartered in Ljubljana and a part of **Austrian Kelag Group**. We're playing a crucial role in our region's shift towards cleaner energy solutions. From investing in, building, and operating renewable energy technologies to actively trading and providing tailored energy services, we're dedicated to driving this transition forward.

Take the next step in your career and join the Interenergo team as an Electrical Engineer. We are looking for an experienced professional to support our operations and engineering team.

The operations and engineering team ensures the safe and reliable operation of our production units, and develops and constructs projects in Southeast Europe and across other European Markets. This position offers career development in an international environment on diverse technologies and exciting engineering projects in the field of energy.

If contributing to the development, construction, and operation of power plants is your dream job and you seek a work environment that offers diverse challenges and opportunities for growth and development within an exceptional team of professionals, then this position is right for you!

Your responsibilities

- Coordination of activities and providing technical support in the development, construction, and maintenance of projects.
- Monitoring the operation of the production units within portfolio.
- Organization and execution of technical inspections and condition assessments of production units.
- Collaboration on integrating new facilities into operational processes.
- Finding, coordinating, and implementing technical and technological solutions.
- Preparing technical requirements in the processes of ordering equipment and services related to the planning, construction, and maintenance of production units.
- Participating in the acquisition or procurement of new projects.
- Organization and execution of factory and site acceptance testing, commissioning, and further tests during trial run period.

Your key attributes and qualifications

- VI. or VII. level of education in electrical engineering, energy, or related technical fields.
- Previous work experience in the energy sector, with desired experience in one of the following areas: design or engineering, operations, and/or maintenance of energy facilities.
- Knowledge of technical standards and regulations in the energy sector.
- Category B driving license.
- Active knowledge of English and desired knowledge of other European languages.

Why join us

- An established company part of Austrian Kelag group, with strong ties across European markets.
- An international work environment that fosters personal and professional growth.
- Exposure to various technologies across all life cycles of production units (from development to operation).
- Comprehensive on-boarding and rotation process.
- Open communication and collaboration.
- Emphasis on ongoing learning and personal growth through training initiatives, conferences and language courses.
- Internal recreational program offering a range of activities including fitness sessions, and skiing tournaments.
- Option to use the Group's holiday accommodations in Carinthia, Austria.
- Supplementary health and pension insurance.

We Are Expanding Our Team! If you do not see yourself in the described responsibilities and experiences but have relevant experience and a strong desire to develop your career at Interenergo, we want to meet you.

We invite you to send us your applications with the attached CV no later than **15.5.2025** by e-mail to: **info@interenergo.si** or by regular mail to: **Interenergo, d.o.o., Gosposvetska cesta 11, 1000 Ljubljana.**
